**Applicant(s)**

KUHNER ET AL.

**Examiner**

Michael A. Friedhofer

**Art Unit**

2832

**Period for Reply** -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

1. Claims 4-7 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

***Claim Rejections - 35 USC § 112***

2. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the phrases "or similar" create limitations that are vague and indefinite making it unclear what is being claimed.

In claim 2, lines 3-4 it is unclear whether these switching means are related to the switching means already claimed.

In claim 3, line 3 the phrase "in particular" creates a limitation within a limitation making the claim indefinite.

In claim 3, line 4 "the data bus" has no antecedent basis.

In claim 3, line 5 it is unclear whether these switching means are related to the switching means already claimed.

In claim 3, line 6 "the data bus" has no antecedent basis.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Chappuis.

Chappuis discloses in the figures a control device for controlling electromedical appliances or appliance groups comprising at least two pedal switches 14 or similar switching means for generating control signals to control the appliances or appliance groups; plug and socket connectors or similar connecting means 18 disposed on the switching means, by way of which the switching means can be connected to one another; allocation means formed by the platform in which the pedal switches are placed since it allocates where the control signals are going for controlling a particular function; and information transfer means 13 to transmit the control signals from the switching means to the appliances.

***Allowable Subject Matter***

5. Claims 2 and 3 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yindra, Neer et al, Thorlakson, Fago et al, Meinel, Abrahamsen,

Lane, Chen, Beerstecher, and Hanson et al teach various methods of connecting and operating a plurality of functions and devices with multiple pedal switches.
